

# PGY2 Ambulatory Care Pharmacy Residency Program

## WHAT IS RIPCPC?

RIPCPC is a multi-specialty Independent Practice Association dedicated to improving patient outcomes through the Patient-Centered Medical Home model

RIPCPC is part of the Integra network, an Accountable Care Organization (ACO), that also includes Care New England (CNE) Health System and South County Health

The Integra ACO has consistently demonstrated high quality care, cost containment, and was recognized by Becker's Hospital Review as one of 144 ACOs to watch in 2018

RIPCPC's patient centered pharmacy program is a part of Blue Cross and Blue Shield of RI pharmacy program that was recognized as First Best Practices at the national Blue Cross Conference

## WHY CHOOSE RIPCPC?

RIPCPC offers a unique ambulatory pharmacy residency experience embedded within an ACO that will prepare you not only to be an exceptional clinician but also give you the knowledge base to create a successful ambulatory care practice on your own

We offer diverse learning experiences that will prepare you for a pharmacy career in ambulatory care and expose you to an innovative healthcare and pharmacy model

Upon graduating, you will be prepared to pass the board certification examination in ambulatory care

You will have convenient access to the cultural amenities of the northeast including Providence, Boston (one hour to the north), as well as the beautiful Rhode Island coast

## LEARNING EXPERIENCES

Primary Care learning experience with RIPCPC/CNE providers

Transitions of Care learning experience will offer a collaborative experience with Integra nurses and nurse practitioners as well as the Kent Hospital Transition of Care team

Metabolic Clinic learning experience within RIPCPC primary care office that will involve optimizing medication regimens for patients with hypertension, diabetes, and hyperlipidemia

Chronic Kidney Disease learning experience in affiliation with Lifespan/Brown health system that will include rounding on dialysis units and meeting with kidney disease patients in clinic

Accountable Care Organization (ACO) and Practice Management learning experience that will allow you to become proficient in innovative healthcare and pharmacy models

Academic learning experience in collaboration with the University of Rhode Island College of Pharmacy.

Research project
